

# Size Charts -- Size 7

**Before printing**, uncheck "Shrink Oversized Pages to Paper Size" in your print dialog box.

To verify that this page was printed at **100% scale**, use a ruler to measure the shoe outline below. The length and width measurements should match those indicated on the shoe outline.

Place the heel of the child's foot along the lower edge of the sole outline. Select a shoe size that allows for a 1/2" of space between the top of the child's toes and the top of the outline. If the child's foot is between sizes, we suggest selecting the larger size.
